Use a 123reg Domain With Your Viewbook Account

1 Login to your 123reg.co.uk account and click “Domain name overview.”

The screenshot shows the 123reg.co.uk control panel. At the top, the logo "123-reg.co.uk" is displayed with the tagline "The UK's #1 domain registrar". Navigation buttons for "CONTROL PANEL" and "SIGN OUT" are visible. A blue navigation bar contains links for "DOMAIN NAMES", "EMAIL", "CREATE A WEBSITE", "WEB HOSTING", and "MARKETING". The user is greeted as "Hello Claire Lowman" with a "sign out" link. A Direct Debit notification box is present, with a "Set up Direct Debit" link. Below this, the "Domain names" section shows a search for "clairelowman.co.uk" with a "Manage" button. A grid of domain management options is shown, with "Domain name overview" circled in red. Other options include "View domains (list mode)", "Domain Privacy", "Domain transfers", "Renew domains", and "Subdomains".

3 Duplicate the CNAME and @ A record settings in the following image. DO NOT change the MX records. Those are for e-mail. You are only concerned with the www CNAME and the @ A record. If you don't see an @ A record create one. If you do not see a www CNAME create one. The @ A record needs to be 174.129.219.149. The www CNAME needs to be sites.viewbook.com.

Manage your DNS for

Basic DNS | **Advanced DNS**

Advanced DNS is recommended for advanced users only, and allows full customisation of your DNS settings. Using this form will disable the basic DNS view.

Warning: If you have an @ record set to a CNAME, all other @ records (including MX) will be ignored and set to the same domain to which it points.

DNS ENTRY	TYPE	PRIORITY	TTL	DESTINATION/TARGET	
@	A			174.129.219.149	
@	MX	10		mx0.123-reg.co.uk.	
@	MX	20		mx1.123-reg.co.uk.	
www	CNAME			sites.viewbook.com.	

Hostname Type **A** Destination IPv4 address **Add**

(eg: something.clairelowman.co.uk) (eg: 94.136.40.129)
